Thanks for your 2/7 w/ enclosures. Hasty note while I await a call to do a radio show then back to work. Save for the great accumulation of paper from various agencies and the continuing addition to a backlog of overdue work nothing new except the weather. Knew you were having it wet but not THAT wet. Sorry for your friend. Glad you latched onto another job. I don't know the show. Maybe Mil does....Our weather is as you saw on TV only we were on the edges and save for powerful winds had much less snow than New England. However, the lane is all ice on the bottom from the first thaw freezing after the first of the snows. I get my arm exercise sunny days by chopping away at the ice around the house. Have most of that cleared not. And hoping that with a few days of sun and some thawing the lane ice will be undermined so the first heavy vehicle breaks it, hastening further thawing. Before another major snow....We are having a year like last year, not exceptionally cold but staying that way. Nights get close to zero, days near freezing. Last couple a little above freezing. It has stayed so cold that we've had no rain at all - all snow. But after being snowed in for a week I did get out. Now I fear not being able to get back if I do transit the ice safely. (A friend took me for the blood test today, leaving her car along the road.)..If you can find time would you please phone Charach and ask him if he is the one responsible for that report of the FBI's I sent you? His source could have been Fensterwald, who could have done no more than gotten twisted. But Ted could have also. But what interests me is what he remembers he did say because increasingly I am finding that the FBI does the twisting to load the files with false, hurt and defamatory records. I'm getting more like that, from other files, where they don't know that the records are phoney...Kil decided that she tried to do too much last tax season so she did not advertise this year. She is getting all the return business she can handle, which makes us both feel good. (She enjoys it, too. She is very good at taxes.) She is at the other end of the house but I know she joins me in satisfaction that you are located again and in thanks. Best,
